COMINN PROJECT'S WEBSITE

The COMINN Project website (www.cominnproject.eu) is a converging platform that gathers all the necessary information related to the Project, more specifically the objectives and aims, the results and events, as well as a small description of the partners. In this website you can also download the **European report: "Different National Innovation Systems. An Overview"**, compiled by all partners as well as the future **Didactic Guide for**

industrial SMEs, to help the middle managers to valorize, develop and mobilize the competences linked to innovation in their daily work with the workers.

COMINN PILOT SIMULATION

The COMINN Project intends to develop, adapt and validate a training itinerary and didactic materials transnationally, which allows to qualify the middle managers and responsible of metal SMEs for the valorisation, development and mobilization of competencies linked to the innovation development (key competences for the employability and competitiveness of the company) that workers have acquired through informal means (creativity, knowledge generation, openness to change).

In this sense, the COMINN Project will have in March, 2012 a **Pilot Simulation**, more specifically an experiment in a real learning situation in the five partner countries, with approximately 40 middle managers to the pedagogical utility of the modules created. For more information contact the Project's website (www.cominnproject.eu).

TRANSNATIONAL MEETING IN BUDAPEST, HUNGARY

On the 13th and 14th of November, the COMINN partners met in Budapest, Hungary for the 3rd Project Meeting. During the two days, all partners presented the developed materials and adjustments were made in order to keep the quality of the project at the highest level. Very soon the didactic module targeted at the middle managers will be available for presentation to key players and stakeholders and for the pilot group.

The working days were complemented with a very interesting social programme, which allowed all partners to experience some of the best that Budapest has to offer.

INTRODUCING TREBAG

TREBAG

TREBAG was established in 1989 as a joint venture (Hungarian-German) company. In 1994, it became a private Hungarian company. The activities of TREBAG have a multidisciplinary character ranging from project foundation to the implementation of results and dissemination. The scope of these activities includes: management consultancy, quality management consultancy, dissemination and demonstration activities, implementation of technology transfer and innovation chain management and organization and management of various R&D projects.

Trebag was promoter of the Leonardo-project that product won the 1st prize on the eFestival in Hungary in 2005 and the European Seal of Excellence in Multimedia prize on the CEEBIT in 2006. Trebag has experience in European projects and transnational cooperation. Trebag has practice in the adult training, organized special training for the facilitator for the elderly persons. Also Trebag became a member of the European Living Lab Network in 2011, therefore promoting living lab activities in the community of Nagykovácsi.
